Weekly Coal Production

Production for Week Ended:
January 27, 1990

Preface

The *Weekly Coal Production (WCP)* provides weekly production estimates of U.S. coal by State, as well as supplementary data which are usually published twice a month. The Coal Exports and Imports Supplement contains annual as well as detailed monthly data on U.S. coal and coke exports and imports. This week's supplement contains detailed monthly data covering electric utility coal consumption, stocks, and receipts (quantity and price). Also, this publication contains coal supply and demand, and coal consumption and coal stocks by sector for 1980-1989.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its

data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report*, the *Quarterly Coal Report*, *Coal Production 1988*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at (202)586-8800.*

Summary

U.S. coal production in the week ended January 27, 1990, as estimated by the Energy Information Administration, totaled 21 million short tons, approximately the same as production in the previous week and 5 percent higher than the comparable week in 1989. Production East of the Mississippi River totaled 13 million short tons, and production West of the Mississippi River totaled 8 million short tons.

Coal consumption at electric utility plants in November 1989 totaled 61 million short tons. For the first 11 months of 1989, utility coal consumption amounted to 693 million short tons, slightly higher than in the comparable period of 1988.

Utility coal stocks on November 30, 1989, totaled 147 million short tons. This was 5 million short tons higher than at the end of October, as the electric utility industry continued to stockpile additional coal for the winter months.

Receipts of utility coal totaled 67 million short tons in October 1989, 2 million short tons more than in September 1989. In the first 10 months of 1989, receipts totaled 627 million short tons as compared with 602 million short tons in the comparable period of 1988.

Note Total may not equal sum of components because of independent rounding Average price is based on the cost including insurance and freight (cif cost)

NOT FOR SALE

BECAUSE IT'S FREE!

Every year the Government publishes thousands of books. And every year the U.S. Government Printing Office sells these books to the public. Now there's a book that tells you about the Government's new and popular publications—but it's not for sale . . . it's *free*!

It's our catalog of books—hundreds of books from virtually every Government agency. The subjects range from agriculture, business, children, and diet to science, space, transportation, and vacations. And there are titles on military history, education, hobbies, physical fitness, gardening, and much, much more! There's also a special section for recently published books.

Find out about the Government's new and popular books by sending today for a copy of the book we *don't* sell. Write—
